

# Florida Water

Florida water is a fragrant water that can be used in place of sage, incense, or candles to cleanse an area or person.

1 portion water - 1 portion cheap vodka

1/2 - 1/4 portion of fragrance materials such as:

Aromatic greens: fresh Mint, fresh Basil, fresh Rosemary

Floral: Rose Petals (fresh), Jasmine (dried or fresh), Lavender (dried)

Citrus: Lemon Peel, Orange Peel, Lime Peel

Spice: Allspice Berries, Cinnamon Sticks, Cloves

Pick 3 separate choices for your choice of fragrance to get the best scent. Spring tends to be floral and aromatic greens. Summer tends to be citrus. Fall tends to be aromatic greens with mild spices. And winter tends to be spice and mint. You can also use essential oils for the fragrance.

You can simmer the vodka and fragrances together for 5-10 min then add the water and pour into a jar and let sit in your fridge.

Or you can pour all ingredients together and let sit for 7 days in your fridge.

It will develop a tinge of color based on the fragrance materials that's natural.
